## SUMMARY

---

A senior IT student majoring in Web and Mobile App Development, specializing in core technologies like HTML, CSS, and JavaScript. Has independently built a full-stack project and is passionate about learning and applying new skills in a professional setting.

## TECHNICAL SKILLS

---

**Front-End:** HTML, CSS, JavaScript

**CSS Frameworks:** Tailwind CSS, Bootstrap

**Back-End:** PHP

**Database:** MySQL

**Tools/Platforms:** Git, GitHub

**Currently Learning:** Full-Stack Development (MERN Stack)

## PROJECTS

---

### Trello Clone

- Built a front-end application replicating the core features of Trello, a popular project management tool.
- Utilized HTML, Tailwind CSS, and JavaScript to manage front-end logic and used local storage to save data across page reloads, even after closing the browser.

### Bookstore E-Commerce Site

- Developed a full-stack e-commerce site using HTML, CSS, and JavaScript for the front-end, with PHP and MySQL for the back-end.
- Integrated the Google Books API to dynamically display product data, demonstrating experience with third-party API calls.

## EXPERIENCE

---

### Salesforce Virtual Internship

**March - May 2025**

- Gained foundational knowledge of the Salesforce platform, exploring its core functionality and completing administrative tasks and a capstone project through guided modules.

## EDUCATION

---

### Bulacan State University

**2022 - 2026 (Expected)**

*Bachelor of Science in Information Technology, Major in Web and Mobile App Development*
